

ON SITE CHARCOAL PRODUCTION Using Home Grown Timber

Within ½mile of the holiday lets...
Cyclical cutting of regenerated home produced
coppice wood for Charcoal and wildlife

Loading the Charcoal kiln with
home produced coppice wood

Closing the lid to the kiln prior to
the charcoal burn.

With a little help from our friends
😊

The burn is underway !

And.....after watching the burn late into
the night, a good result was confirmed the
next day :)

The youngest member of the family
thought that bagging the Charcoal was
the best part!

And the Charcoal journey is
completely produced within ½mile
from 'Oakwood West Holidays' :)
